# **2<sup>nd</sup> INTERNATIONAL CONFERENCE ON HEALTH PROFESSIONS EDUCATION**

## **ABOUT ICHPE**

The University of Lahore in collaboration with Institute for Advancement of Dental Sciences and Research held a joint conference on health professions education. The theme of the conference was “Health Professions Education: The change imperative” from 15th to 17th August 2014.

The University Of Lahore is organizing its 2nd International Conference on Health Professions Education from 14th to 17th October 2018. Theme of the conference is: “Emerging trends in HPE in 21st century”. A fine galaxy of international and national speakers will honor the floor. The conference will provide an equal opportunity to the faculty and the students, to learn about curriculum, assessment, communication skills, professionalism, leadership and personal development.

## **AIMS & OBJECTIVES**

1. To provide opportunity to medical teachers to develop skills in health professions education, research, data analysis, leadership and virtual learning environment.
2. To gain competence in research, academic writing, assessment, curriculum, teaching and learning and student motivation.
3. To provide a platform for debate and discussion on accreditation system, assessments, interprofessional education and selection criteria in a medical school.
4. To provide a platform for researchers in health professions education to showcase their work

## MESSAGES

**Prof. Shahid Mahmud Malik**

Conference Chair person  
Pro-rector, University of Lahore

It's a pleasure for me to welcome you to 2nd International conference on Health Professions Education, ICHPE'2018. The theme of the conference this year is "Emerging trends in HPE in 21st century".

Because of the pioneering work of early medical educationist from last century, this field has opened up to embrace all health professionals. This has not only turned them into true professionals and teachers but has revolutionized the core of medical education globally.

The objective of the conference is to share your experiences and get a chance to learn from renowned medical educationists from around the world.

The conference program is rich in its context spread over four days and includes plenaries, symposia, what the expert says. It gives a chance to share your ideas, oral and poster presentations. We have also arranged pre-conference activities, which includes pre-conference courses and pre-conference workshops.

Wish you a pleasant experience in Lahore and ICHPE'18.

**Dr. Mahwish Arooj**

Chairperson, Organizing  
committee

On behalf of the organizing committee, I am delighted to welcome all the delegates and participants to 2nd International conference on health professions education '2018 (ICHPE). The conference will be held from 14th to 17th October'2018 in University College of Medicine and Dentistry.

Various programs consisting of keynote, plenary symposia, what the expert say session have been arranged and the organizing committee has managed to invite various national and international speakers. The conference will also provide an opportunity to students and researchers to share their research and contribution towards medical education through oral and poster presentations, thus providing a platform to participants to share their ideas that will expand their knowledge.

The organizing committee members of ICHPE from The University of Lahore are looking forward to welcoming you at the 2nd International conference on Health Professions Education'2018 in Lahore, Pakistan.

**Prof. Dr. Rehan Ahmed Khan**

Chairperson, Scientific  
committee

It's a great pleasure and honor to welcome all of you to the 2nd International ICHPE-oCTOBER'2018 to be held in Lahore, Pakistan. The program will start on Sunday, 14th October with the pre-conference courses on basics of medical education, assessment, research and leadership and pre-conference workshops on the day 2 i.e. 15th October'2018. Following that, the main conference will take place on 16th and 17th October'2018 in University of Lahore. The scientific committee of ICHPE has tried to put together a program that will enlighten the participants from trends in the health professions education in the 21st century. Apart from the talks, participants will also get a chance to interact with distinguished and renowned speakers during what the expert say session.

Looking forward to seeing you at ICHPE'2018.

## EXECUTIVE COMMITTEE

<b>Prof. Dr. Shahid Mahmud Malik</b> <i>Conference Chair person</i>	<b>Dr. Mahwish Arooj</b> <i>Chairperson, Organizing committee</i>
<b>Prof. Dr. Farrukh Iqbal</b> <i>Member</i>	<b>Prof. Dr. Moghees Baig</b> <i>Member</i>
<b>Mrs. Ammara Awais</b> <i>Director, OSA-Member</i>	<b>Prof. Dr. Rehan Ahmed Khan</b> <i>Chairperson, Scientific committee</i>
<b>Dr. Sikandar Afzal</b> <i>Member</i>	<b>Prof. Dr. Rahila Yasmeen</b> <i>Co-Chair, Scientific committee</i>
<b>Dr. Syed Hasan Shoaib</b> <i>Co-Chair, Organizing committee</i>	<b>Mr. Iftikhar</b> <i>Member</i>
<b>Dr. Amir Gillani</b> <i>Member</i>	

## ADVISORY COMMITTEE

<b>Prof. Dr. Gohar Wajid</b> <i>Member</i>	<b>Dr. Usman Mahboob</b> <i>Member</i>
<b>Dr. Sikandar Afzal</b> <i>Member</i>	<b>Dr. Mohamed Al Eraky</b> <i>Member</i>

**REGISTRATION DESK VENUE (EE BUILDING GROUND FLOOR)**

# PLENARY SPEAKERS

**Dr. Jack (John) R. Boulet, Ph.D.**

*Vice President for Research and Data Resources.*

*Co-Chair of the ECFMG Internal Research and Data Review Committee*

## THE CONTRIBUTION OF PAKISTANI-EDUCATED PHYSICIANS TO THE INTERNATIONAL HEALTH WORKFORCE

Many physicians educated in Pakistan complete their graduate training in the United States (US) and then go on to practice medicine outside of Pakistan. Based on the American Medical Association (AMA) Masterfile (2018), there are 13,348 physicians in active practice in the US who obtained their medical degree in Pakistan. Nearly 29% (n=3,790) specialized in internal medicine. Most of these physicians (51%) attended 1 of 3 medical schools (Dow Medical College, King Edward Medical University, Aga Khan University Medical College).

International medical graduates (IMGs) must be certified by the Educational Commission for Foreign Medical Graduates (ECFMG) to be eligible to enter accredited graduate medical education (GME) programs in the US. The certification process includes credential verification and successful completion of the United States Medical Licensure Examination (USMLE) Steps 1 and 2. In 2023, physicians applying for ECFMG certification will also be required to graduate from a medical school that has been appropriately accredited. ECFMG certification requirements, combined with global economic and political changes, could impact the flow of international medical graduates to the US and other countries. From 2009 to 2016, the number of ECFMG applicants from individuals who attended medical school in Pakistan increased from 755 to 1178. In 2017, applications from Pakistani medical schools dropped to 1,103. The number of ECFMG certificates issued to graduates of medical schools in Pakistan decreased by 95 between 2016 (n=768) and 2017 (n=673).

**Dr. Mohamed M.Al-Eraky**

*MBBCh, MSc, MMed, PhD*

*Director for Development & Academic Initiatives at the Vice-President Office for Academic Affairs at Imam Abdulrahman Bin Faisal University, Saudi Arabia.*

## ASSESSMENT OF PERSONAL QUALITIES AT THE 'IS' LEVEL

Assessment in the post-psychometric era moved from pure objectivity to encompass a more holistic and subjective notions. New domains for assessment have emerged over the past few years (beyond individual's knowledge and competence), that proved to have a great impact on the future careers of health professionals. Assessors became more concerned to enrich their toolbox with valid methods and protocols to assess the personal qualities of their candidates, not at the Knows, Shows or Does, but at the 'Is' level. The key question is: What are the salient personal qualities (at the Is level) that can be taught/assessed or selected in medical students on admission, without being too judgmental?

**Dr. Hesham Marei**

*MSc, FDS (RCS-Eng.), PhD (OMFS), MHPE, PhD (Med. Ed.)*

## TWELVE TIPS FOR EFFECTIVE DESIGN AND INTEGRATION OF VIRTUAL PATIENTS IN MEDICAL EDUCATION

A VP is recognized in the context of medical education as an interactive computer simulation of a real-life clinical scenario for the purpose of teaching, learning and assessment. Although VPs are being applied at an increasing rate and with growing levels of success in developing clinical reasoning skills, and are generally positively perceived by both learners and medical teachers, there is still a call for more research to disclose how VPs can be effectively integrated into a curriculum. The presentation is going to provide tips on the effective design and integration of VPs into a medical curriculum.

**Prof. Dr. Gohar Wajid**

## **DEVELOPING ACCREDITATION SYSTEM FOR MEDICAL & DENTAL COLLEGES IN PAKISTAN: WHOSE STANDARDS ARE THESE?**

There is a growing trend towards quality assurance and accreditation of medical schools worldwide. Globally, countries use accreditation and standards as regulatory mechanisms to ensure the quality of medical education, and in turn healthcare. Liaison Committee on Medical Education (LCME) and Committee on Accreditation of Canadian Medical Schools set standards and accredit medical schools in the USA and Canada respectively. Ireland, Australia and many other countries have adapted World Federation for Medical Education (WFME) standards for accreditation purpose. WFME published first set of standards for Basic Medical Education in 2003 and further refined them in 2012 and 2015, based on feedback from international experts. Their purpose is to encourage self-evaluation and bring improvements among institutions providing medical education. WFME has already provided recognition status to seven accreditation agencies (from Japan, Caribbean, Korea, USA, Canada and Turkey) and several others (from Thailand, Sudan, Brazil, Mexico, Egypt etc.) are under review. WFME recognition, although not mandatory, helps in establishing global credibility of national accreditation agencies and strengthens collaboration among them. WFME standards are structured under nine areas with 35 sub-areas, at two levels: 'basic standards' or minimum requirements; and relatively advanced standards called 'quality standards'. Basic standards are mandatory while quality standards are optional. Pakistan Medical and Dental Council (PM&DC) has long history of recognizing medical and dental colleges based on inspection criteria developed by PM&DC experts. There is a need to review the current PMDC standards and develop an accreditation system within the PM DC that is responsive to the needs of Pakistani medical and dental colleges and has the capacity to respond to global recognition as well. PM&DC needs to take all stakeholders in confidence while developing the new accreditation system and standards. This presentation will present a framework on how such accreditation system can be developed at the PM&DC.

**Prof. Dr. Idrees Anwar**

*FRCS(GLAS), DCPS(HPE), MHPE(KMU)*

*Dean , Surgery & Allied Health Sciences*

## **DISEASES OF DOCTORS AND MEDICAL PROFESSIONALISM**

This presentation is based on research on professional and ethical behavior of doctors in light of Islamic teachings. We as doctors treat physical diseases but unknowingly we also suffer from many diseases. They are not physical ailments but affect our hearts and soul. They silently creep inside you and make you unprofessional and unethical. At times we ourselves are unaware of their presence.

These diseases are; Kibar (Excessive Pride), Nifad us sabar (impatience), Alfatoor (apathy), Zulum (injustice), Taiqan (assuredness), Tamah (Worldly Greed), Tajassu ( spying ), Gibah ( backbiting ), Nameemah (tale telling). The presentation aims to develop the understanding of these sins and diseases and if there is even a shred of evidence that we have them we should treat ourselves. These have been adapted after research from Quran and Sunnah of our prophet (peace be upon Him).

This is also an abstract from my book "the Muslim doctor".

**Prof. Dr. Lubna Baig**

*Pro-Vice Chancellor, Dean of APPNA Institute of Public Health Jinnah Sindh Medical University Pakistan*

## **POLITICS AND PEDAGOGY OF MEDICAL EDUCATION**

The health science curricula should be built on pedagogical approaches and not executive decisions. This can ensure that the health professionals training institutions are graduating competent and safe practitioners for tomorrow. The development and implementation of curriculum is not a one-dimensional process ironically it is influenced by multiple forces. These forces in general include in addition to academicians and relevant stake holders political waves of the community and country. Ideally a curriculum of a health institution should be in sync with health issues of the country and match the ability of the providers (faculty and managers) and receivers (students). The politics of curriculum and health reform in general is not an undesirable process as long as the politics does not take over the pedagogy.

This paper will discuss the positive and negative connotations associated with politics of medical education and highlight the importance of a curriculum build on contemporary evidence and takes into account the resources available and the health needs of the community.

**Prof. Dr. Rehan Ahmed Khan**

*Assistant Dean Medical Education and Professor of Surgery*

*Islamic International Medical College, Riphah International University. Professor Health Professions Education and Program Director, MME. The University of Lahore.*

## **ASSESSMENT IN INTEGRATED MODULAR CURRICULUM - FROM CONCEPT TO APPLICATION**

Assessment drives learning. In our traditional based system, where concepts of internal and external assessment runs in parallel with formative and summative assessment with very little room for programmatic assessment; this talk will highlight the journey of changing the assessment process for discipline based to integrated curriculum in alignment with the accreditation body.

# WHAT THE EXPERT SAYS?

**Prof. Dr. Muhammad Tariq**

*FAIMER Fellow (Philadelphia), MHPE (Maastricht)  
Interim Associate Dean, Education, FHS- Aga Khan University*

## **LEARNING IN THE CLINICAL SETTING: WORKPLACE CLINICAL TEACHING MODELS**

Teaching in the clinical environment is a demanding, complex and often frustrating task, a task many clinicians assume without adequate preparation or orientation. The clinical environment consists of inpatient, hospital outpatient and community settings, each with their own distinct challenges. The dual role of a Clinical Teacher is to teach as well as to see patients and how to balance is a challenge. Clinical Teaching is compromised and there are identified problems and challenges.

The development of learners' diagnostic competence remains a major challenge for every clinical teacher. Various workplace models of clinical teaching have been described in literature, including; One minute preceptor, mini-CEX, SNAPPS, MiPLAN, Cognitive Apprenticeship Model etc.. 12 Tips, MiPlan model and Stanford Faculty Development models can be considered for Inpatient teaching. One minute Preceptor Model can be used in inpatient, outpatient and all clinical settings. SNAPPS is for outpatient setting. Cognitive Apprenticeship Model can be applied to any clinical setting

**Dr. Masood Jawaid**

*Director Medical Affairs and eLearning, PharmEvo; Project Lead Virtual University, Jinnah Sindh Medical University  
Associate Editor, Pak J Med Sci*

## **THE NEGLECTED POWER OF VIRTUAL LEARNING ENVIRONMENTS (VLE)**

A virtual learning environment (VLE) is a set of teaching and learning tools designed to enhance a student's learning experience by including computers and the internet in the learning process. The principal components of a VLE package include curriculum mapping (breaking curriculum into sections that can be assigned and assessed), student tracking, online support for both teacher and student, electronic communication (e-mail, threaded discussions, chat, Web publishing), and Internet links to outside curriculum resources. VLE are focused on online learning delivery but support a range of uses like blended learning and flipped classrooms. Most of the universities in Pakistan is having and LMS installed. However, majority of them are using this powerful tool at very minimum level. In this presentation, presenter share his experience of development of distance learning unit in Universities, logistics requirements, training of faculty as well as development of advance learning contents in flash and html5 and integrating them with VLE as SCORM packages. Some demonstration of learning contents also shared with the audienc.

**Prof. Dr. Asim Mehmood**

*Professor of Neurological Surgery - Wayne State University  
Director, Neuro-Trauma Program*

**QUALITY ASSURANCE OF HEALTH CARE IN DEVELOPING COUNTRIES**

Quality assurance is that set of activities that are carried out to establish standards and improve performance so that care provided is as effective and as safe as possible. Until recently, quality assurance was primarily used by hospitals in developed countries. However, several characteristics of the quality assurance approach make it very appropriate for developing countries. We investigated the state of quality assurance of health care in developing countries utilizing the data from Primary Health Care Operations Research (PRICOR) conducted by the World Health Organization (1985-1992). We also obtained information from the Amono-Lartson study (1984) as well as Sauerborn study (1989).

The infrastructure and resources for quality assurance in developing countries are poorly developed because of scarcity of human resources, equipment and finances to run such initiatives. The focus in assessment of quality has been put primarily on availability of healthcare rather than on document-based analysis of the process of care. There is lack of organized indigenous efforts to set up standards of care appropriate for local communities.

Quality assurance is the main tool for quality improvement in developing countries. It should be oriented towards meeting the needs and expectations of the community. It should focus on systems and processes and utilize data to analyze service delivery processes. A team approach is essential for problem solving and quality improvement

**Dr. Brekhna Jamil**

*Assistant Professor, Medical Education Department  
Khyber Medical University*

**EXPERIENCE OF DEVELOPING ENTRUSTABLE PROFESSIONAL ACTIVITIES IN DENTISTRY**

Entrustable professional activities provide the framework for designing and implementing the competency based training. It has been adopted in different medical specialties worldwide. Developing EPAs is a challenging task as it is a new concept and especially in dentistry. EPAs were developed for priority areas in dentistry. This presentation will describe about the experience in developing EPAs with emphasis on its significance of EPAs in terms of training programme, specialty area, stakeholder interests and resourcing.

**Mr. Shaukat Ali Jawaid**

*Chief Editor  
Pakistan Journal of Medical Sciences*

**MENTORING VS COACHING**

A Mentor is an established practitioner and respected peer who offers thorough and ongoing professional relationship with his or her mentee, opportunities to develop, stimulate and maintain their professional and personal development. On the other hand a Coach is a focused job and performance oriented. The presentation will highlight the differences between a Mentor and a Coach, mentoring relationship, ability of a good Mentor and his responsibility. Different mentoring processes, differences between the roles of Mentors and a Coach, mentoring, coaching relationship, and their source of

influence will also be highlighted. In the field of academics and scientific publishing, medical teachers, authors, reviewers, editors and librarians can all work as Mentors or Coach. Where one can find the Mentors and how to get inspired to think what, when, where and how often to publish will be discussed. The presentation will also highlight whether it is worthwhile to send your published work to colleagues for comments, feedback and to be mindful of line between sharing news of one's accomplishments and appearing as self congratulatory will be highlighted.

**Dr. Muhammad Shahid Shamim**

*MBBS, FCPS, FRCS, Dip-Bioethics, MHPE, PhD Scholar  
Professor of Surgery and Health Professionals Education  
Dow University of Health Sciences, Karachi*

**BIOETHICS IN MEDICAL EDUCATION: CHALLENGES AND OPPORTUNITIES**

Bioethics is an essential part of medical curriculum in most medical institutes around the World, including Pakistan. Much has been said about its importance and requirement for developing healthcare professionals. However, ethics education is still facing challenges in implementation due to multiple factors. These factors concern learners, faculty, resources, educational processes, community expectations and cultural contexts. This paper discusses the challenges in ethics education and attempts to identify the opportunities for providing solutions. The paper initially provides a holistic view of ethics education globally and reflects on the issues that are being faced on a regional level, developing Asian countries. The paper then deliberates the author's experience for recognizing resolutions for ethics education from the available opportunities

**Dr. Sumera Badar**

*Assistant Professor  
Faisalabad Medical University*

**“MEDICAL INSTITUTIONS; ARE WE AIMING FOR COMPLIANCE OR CHARACTER?”**

This talk is about incorporating teaching and training for the moral development of the professionals. It is not just the compliance but the reasoning underpinning the actions. Moral development principles will be shared briefly and emphasis will be on role modeling.

**Prof. Dr. Moghees Baig**

*Principal, University College of Dentistry*

**PROFESSIONALISM: SHOULD IT BE TAUGHT OR DEMONSTRATED?**

Professionalism is being introduced as a subject in the latest curriculums of Medical and Dental Colleges, primarily being fostered by Medical Education Departments. Unfortunately, in our cultural context of academic centers and the behaviour that our faculty models, are often inconsistent with the formal teaching of professionalism and its acceptable universal standards.

Various definitions of professionalism have been carved to inculcate altruism, accountability, excellence, honor, integrity and respect for others, but as all these qualities are not knowledge based or technical in nature, therefore their teaching solely as a subject cannot achieve the desirable objectives.

In this presentation our goal is to challenge medical educators to engage in open dialogue as to identify the suitable tools of teaching and assessing professionalism along with the construction of incentives that demonstrates that the profession truly values these attributes. Additional parameters may also need to be identified to reconcile the gap between our aspirations and the reality on the ground.

Recent surveys show that most of medical and dental schools in the western world, does include formal instructions of professionalism, but still requires evidence about best practices aimed at achieving desired goals that are demonstrated by the graduates of those institutions. It has always been cautioned that, “The quality of medical education must be evaluated by what it produces.”

It has thus been suggested by reviewing various studies that role modeling through informal and hidden curricula, coupled with incentives to behave professionally could reveal meaningful and long-lasting results as compared to formal teaching through one or multiple courses.

## BOG SIDE ROOM

### Poster Session 2

#### 38 posters

Two technical experts will conduct the poster session. Each presenter will get 5 minutes for presentation and 2 minutes for discussion

#### Chair:

- Prof. Dr. Gohar Wajid
- Prof. Dr. Rahila Yasmeen
- Prof. Dr. Ahsan Sethi
- Prof. Dr. Rehan Ahmad

#### Presenters:

1. Syed Hussain Raza Zaidi
2. Fauzia Butt
3. Sobia Nawaz
4. Sibtain Raza
5. M. Mustehsan
6. Syeda Shaista Waheed
7. Fatima Aslam
8. Nighat Majeed
9. Zareena Akram
10. Faiza Farooq
11. Asma Rasheed
12. Rabia Khurram
13. Saira Afzal
14. Fadia Asghar
15. Humaira Gulnaz
16. Fatima Zia Zaidi
17. Khadija Mukhtar
18. Badar Gill
19. Qundeel Zahra
20. Shumaila Zia
21. Arooj Zafar
22. Attiya Rasheed
23. Javeria Usman
24. Syed Shaukat Hussain
25. Syed Faraz Ul Hassan Shah
26. Ahmad Liaquat
27. Sumera Nisar
28. Talat Waseem
29. Anwar ul Haq
30. Sajid Aziz
31. Nasir Ahmad
32. Muhammad Tauqeer Ehsan
33. Amrah javaid
34. Muhammad Imtiaz
35. Aabish Mehreen
36. Remsha Mustafa
37. Muhammad Sohaib Nawaz
38. Adeel Dhahri

SESSION 3  
14:30-16:30

# SUMMARY OF ACADEMIC ACTIVITY

ACTIVITY	SESSIONS	HOURS
Plenary	2	4
Symposia	4	7
What the expert says	1	2
Courses	5	27.5
Pre-Conference Workshops	26	78
Pre-Conference Student Seminar	1	3
Research Papers	9 (88 papers)	16.5
Poster presentation	2 (79 posters)	4

## VENUES

Lunch Venue:	Cafeteria 1st Floor (all days)
CRIMM & UCMD Board rooms:	UCMD Building
BOG and BOG Side room:	EE Building (Near Mosque)
Auditorium 1 & Auditorium 2:	In front of cafeteria and Bookshop

# ABOUT LAHORE CITY

## LAHORE THE HEART OF PAKISTAN

Lahore is the second largest city of Pakistan and the provincial capital of the Punjab. Historically, it is said to be about 2000 years old. In earliest times, it was a colony of Kangra hill Kingdoms and was a cut-off township on the trade route to Delhi. It had hardly any reputation in the Pre-Muslim era. Lahore came to fame with Islam in South Asia, known as the Gardens of the Mughals or City of Gardens, after the significant rich heritage of the Mughal Empire.

## LIFE IN LAHORE

The history, institutions, food, clothing, films, music, fashion and a liberal community lifestyle attracts many from all over the country. Lahore is a very festive city; the people of Lahore celebrate many traditions throughout the year, blending Mughal, western and current trends. Lahore has a large Muslim population; and houses roads and businesses are lit up for days during these public holidays.

Life is beautiful on the street here in Lahore food street, centre of traditional Pakistani food. Lahore's are known for their love of food and eating. There are several places in Lahore famous for its food trends, but recently constructed food street in the historical location of Lahore (Gawalmandi, Anarkali, and Badshahi) has attracted many tourists around the world.

## The University of Lahore

1-km Defence Road, off Bhuptian Chowk, Lahore
